Urinary S/O Moderate Calorie is a complete dietetic feed for cats, formulated to dissolve struvite stones and reducing their recurrence through its urine acidifying properties and its low level of magnesium.

RECOMMENDATIONS: It is recommended that a veterinarian's opinion be sought before use. Feed Urinary S/O Moderate Calorie for 5 to 12 weeks for the dissolution of struvite stones and up to 6 months for the reduction of truvite stones are the set should be a populated regularly. struvite stone recurrence. Then the cat should be re-evaluated regularly by the veterinarian to assess the relevance of a life long recommendation. Water should be available at all times.

NOTE: in older cats, renal function should be checked before Urinary S/O Moderate Calorie is advised.

#### RECOMMENDED FOR CATS WITH TENDENCY TO BE OVERWEIGHT IN CASES OF

- Struvite uroliths: dissolution and management of recurrence
- Calcium oxalate uroliths: management of recurrence

#### **NOT RECOMMENDED IN CASE OF**

- Chronic Kidney Disease (CKD)
- Heart disease (when sodium restriction is sought)
- Concurrent use of urine-acidifying drugs
- Growth, gestation/lactation

#### STRUVITE DISSOLUTION

Helps dissolve all types of struvite stones.

#### **MODERATE CALORIE**

Moderate calorie content to help maintain ideal weight.

#### **URINE DILUTION**

Urine dilution makes the urine less liable to form struvite and calcium oxalate stones.

Helps lower the concentration of ions contributing to crystal formation.

This product creates an unfavorable environment to creation of oxalate and struvite uroliths in the urine.
